Program Name

Electric and Hybrid Vehicle Service Technician

Transcript Title

EV and HEV Service Technician

Department

Transportation Technologies

Division/College

Adv Tech/Public Serv Careers

Academic Level

Credit

Program Code

CTEHST

Type of Award

Certificate

Does this program lead to licensure?

Yes

Describe the licensure/certification

ASE testing prep

Is this intended to be an embedded program?

Yes

Parent Program(s)

Parent Program

Transportation Technologies

Is this program occupational?

Yes

Is it state approved?

No

Program Occupation

High Demand Occupation

High Skill Occupation

High Wage Occupation

CIP Code

470604 - Automobile/Automotive Mechanics Technology/Technician.

Purpose

New program purpose and goals

Program title change requires new program code. Formerly CTEVST Electric Vehicle (EV) Service Technician.

Expanding current EV focused curriculum to include HEV systems. While fully electric vehicles continue to grow in market share, hybrid vehicles remain a significant and prevalent segment of the automotive industry and are widely represented in both current fleets and service environments.

By incorporating hybrid vehicle theory, technology, diagnostics, and repair into the program, students will gain broader and more relevant technical competencies. This change ensures graduates are not limited solely to EV applications but are instead prepared to work with a wider range of electrified powertrains commonly encountered in the workforce. Hybrid systems combine internal combustion engines with high-voltage electrical components, making them an essential bridge technology between conventional and fully electric vehicles. Expanding the program scope improves graduate employability, aligns the curriculum with current industry needs, and better reflects the realities of today's automotive service sector. This update enhances the program's relevance while maintaining its focus on advanced vehicle electrification technologies.

Program Description for Catalog

In this program, students will be introduced to the skills needed to perform as an entry level technician within the rapidly growing electric (EV) and hybrid (HEV) vehicle market. Students will learn how to identify and practice the safety standards and precautions needed when servicing EVs and HEVs. Topics of study will include, but will not be limited to: EV and HEV service and maintenance procedures, EV and HEV specific tooling, high-voltage and low-voltage system diagnostics, and battery management system operation along with ever evolving new technologies incorporated in the production of EVs and HEVs. This certificate will prepare students for EV-specific and HEV-specific ASE testing required for the industry.

PROGRAM CHANGE FORM

Program Code: CTEVST	Current Program Name: Electric Vehicle (EV) Service Technician	Effective Term: Fall 2026
Division Code: ATP	Department: Transportation Technologies	

Directions:

1. Attach the current program listing from the WCC catalog or website and indicate any changes to be made.
2. Draw lines through any text that should be deleted and write in additions. Extensive narrative changes can be included on a separate sheet.
3. Check the boxes below for each type of change being proposed. Changes to courses, discontinuing a course, or adding new courses as part of the proposed program change, must be approved separately using CurricUNET, but should be submitted at the same time as the program change form.
4. If changes affect the program assessment plan or if program outcomes are updated, please submit a Program Assessment Plan Change form. These changes must be approved separately from the program change form and should be submitted at the same time. Current program assessment plans can be found on the Curriculum and Assessment Program Information page.

Requested Changes:

<input type="checkbox"/> Remove course(s): _____	<input checked="" type="checkbox"/> Program outcomes (may also result from removing or adding a course)*
<input type="checkbox"/> Add course(s): _____	<input type="checkbox"/> Program assessment plan*
<input checked="" type="checkbox"/> Program title (new title is <u>Electric and Hybrid Vehicle (EV) Service Technician</u> (CTEHST))	<input type="checkbox"/> Accreditation information
<input checked="" type="checkbox"/> Description	<input type="checkbox"/> Other _____
<input type="checkbox"/> Advisors	
<input type="checkbox"/> Program admission requirements	
<input type="checkbox"/> Continuing eligibility requirements	

Note: A change to the Award Type requires the submission of a new program proposal form and a separate program inactivation form. Contact the Director of Curriculum & Assessment for more information.

Show all changes on the catalog page you attach.

* Please submit a Program Assessment Plan Change form.

Rationale for proposed changes: The proposed program change expands the current Electric Vehicle (EV)–focused curriculum to include Hybrid Electric Vehicle (HEV) systems. While fully electric vehicles continue to grow in market share, hybrid vehicles remain a significant and prevalent segment of the automotive industry and are widely represented in both current fleets and service environments. By incorporating hybrid vehicle theory, technology, diagnostics, and repair into the program, students will gain broader and more relevant technical competencies. This change ensures graduates are not limited solely to EV applications but are instead prepared to work with a wider range of electrified powertrains commonly encountered in the workforce. Hybrid systems combine internal combustion engines with high-voltage electrical components, making them an essential bridge technology between conventional and fully electric vehicles. Expanding the program scope improves graduate employability, aligns the curriculum with current industry needs, and better reflects the realities of today’s automotive service sector. This update enhances the program’s relevance while maintaining its focus on advanced vehicle electrification technologies.

Financial/staffing/equipment/space implications:

List departments that have been consulted regarding their use of this program.

Advanced Manufacturing

Electric Vehicle (EV) Service Technician (CTEVST) Certificate

Program Effective Term: Fall 2025

High Demand Occupation High Skill Occupation High Wage Occupation

In this program, students will be introduced to the skills needed to perform as an entry level technician within the rapidly growing electric vehicle (EV) market. Students will learn how to identify and practice the safety standards and precautions needed when servicing EV's. Topics of study will include, but will not be limited to: EV service and maintenance procedures, EV specific tooling, high-voltage and low-voltage system diagnostics, and battery management system operation along with ever evolving new technologies incorporated in the production of EV's. This certificate will prepare students for EV-specific ASE testing required for the industry.

Major/Area Requirements		(22 credits)
ATT 130	Automotive Service	4
ATT 131	Automotive Electrical	4
ATT 256	Electrical and Electronic Systems	4
ATT 180	Alternative Vehicle Fundamentals & Safety	2
ATT 280	Introduction to Electric Vehicles (EV)	4
ATT 282	Electric Vehicle (EV) Energy Management	4

Minimum Credits Required for the Program: 22

Program Description for Catalog and Web site	<p>In this program, students will be introduced to the skills need to perform as an entry level technician within the rapidly growing electric vehicle (EV) market. Students will learn how to identify and practice the safety standards and precautions needed when servicing EVs. Topics of study will include, but will not be limited to: EV service and maintenance procedures, EV specific tooling, high-voltage and low-voltage system diagnostics, and battery management system operation along with ever evolving new technologies incorporated in the production of EVs. This certificate will prepare students for EV-specific ASE testing required for the industry.</p>
Program Information	<p>Accreditation/Licensure - ASE Tests</p> <p>Advisors - Niki Lee, Justin Morningstar, Shawn Deron</p> <p>Advisory Committee - Same as ASV/ATT</p> <p>Admission requirements -</p> <p>Articulation agreements - TBD</p> <p>Continuing eligibility requirements -</p>

Assessment plan:

Program outcomes to be assessed	Assessment tool	When assessment will take place	Courses/other populations	Number students to be assessed
Identify safety standards and protocols when servicing electric vehicles.	ATT 280 - Outcome-related exam questions	Fall 2027	All sections of ATT 280	All students
Perform service according to the manufacturers' recommended maintenance intervals.	ATT 280 - Outcome-related exam questions	Fall 2027	All sections of ATT 280	All students
Diagnose and service EV batteries and operating subsystems.	ATT 282 - Outcome-related student achievement checklist	Fall 2027	All sections of ATT 282	All students

Scoring and analysis plan:

1. Indicate how the above assessment(s) will be scored and evaluated (e.g. departmentally-developed rubric, external evaluation, other). Attach the rubric.

Outcome-related exam questions will be scored using an answer key.

Student achievement checklists will be scored with a departmentally-developed rubric.

2. Indicate the standard of success to be used for this assessment.
The standards of success used for each outcome will be 70% of the students will score 70% or higher on the outcome-related questions or outcome-related rubric items.

3. Indicate who will score and analyze the data.

Departmental Faculty will score and analyze the data for reporting.
